

FISCAL NOTE

HB 2086 - SB 2153

February 1, 2002

SUMMARY OF BILL: Requires the State Board of Education to establish a program of instruction on cardio-pulmonary resuscitation techniques for public junior or senior high schools. Participation in this instruction shall be required by all students at least once during their attendance in junior or senior high school.

ESTIMATED FISCAL IMPACT:

MINIMAL

Assumes no additional cost to LEAs since CPR instruction is already included in the Lifetime Wellness curriculum for grades 9-12 and the Healthful Living standard of the 7th and 8th grade Comprehensive School Health curriculum.

Note: If the intent of the bill is to have each student certified in CPR, it is estimated that the cost could be up to \$45 per student. In addition, requiring each student to be certified would require changing the state curriculum standards.

CERTIFICATION:

This is to duly certify that the information contained herein is true and correct to the best of my knowledge.
